

• Panel fencing “Ambasciata”

Prestige and privacy.

An elegant, prestigious and extremely robust fence.

The special type of mesh produced from expanded sheet-metal protects your privacy **by almost totally making it impossible to see through from the outside, whilst allowing good through-vision from the inside.**

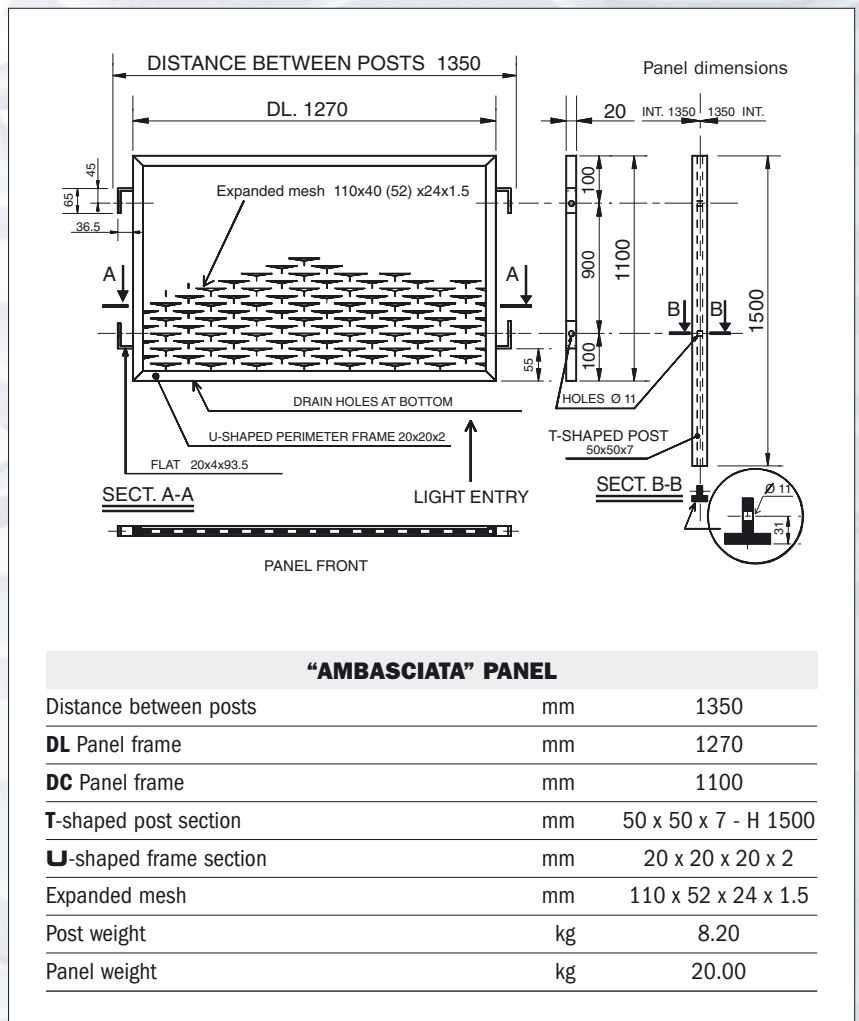

Production

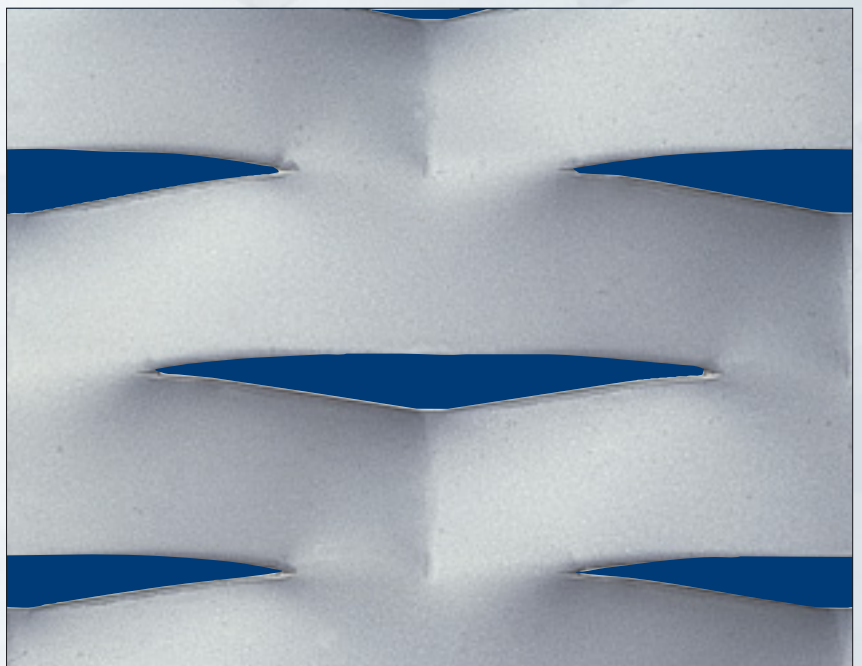

Our fences come in standard sizes and can also be made to order. The posts and fixing bolts are supplied together with the panel.

Finish

The panels and posts can be supplied: untreated, hot dip galvanised or painted with polyester powder exterior paint in all RAL table colours.

The expanded mesh panels are quickly and simply fitted to the posts using M10 x 25 mm nuts and bolts (hot dip galvanised steel or AISI 304 steel).

Life-size mesh, TYPE AMBASCIATA
DL 110 x DC 40 (52) - av 24 x sp 1.5 mm
